1 Overview

1.1 Subject

AT2KD6K6B-LF/LW series full-sealed on-board charger and DC/DC integrated is a product specially designed for new energy vehicle by ANNREN Technologies Co., Ltd according to China standard QC/T895-2011 《Conductive On-board Charger for Electric Vehicle》 and GB/T24347-2009 《Electrical Vehicle DC/DC Converter》, which function is as the battery charger plus providing the 12V low voltage DC power supply for low voltage devices in the vehicle, the output can connect to 12V back-up battery, DC-DC converter will make the charge management to the back-up battery. This product not only has the advantages of high efficiency, small size, high stability, long-lifetime but also with the performance of high protection level, high reliability, more protection functions, it is an ideal solution for electrical vehicle. Thermal sensor is built-in the charger, has the function of over-temperature and can auto-recovery when temperature decreased. With the process of full-sealing, achieve the protection level of IP67, which make sure the excellent working under the complicated operation condition.

1.2 Main Features

- 1.2.1 Support UDS diagnosis, with CAN wake-up function
- 1.2.2 Full-sealed process, can reliably work in the temperature of -40 $^{\circ}\text{C}$ ~55 $^{\circ}\text{C}$
- 1.2.3 Built-in thermal sensor, shut off when temperature up to 90 $^{\circ}\mathrm{C}$
- 1.2.4 Protection level IP67

▲ Humidity: relative humidity 5%~95%, no condensation

▲Altitude: ≤3000m

▲ Working noisy: max when working ≤65dB, meet China standard QTC 895-2011

4 Charger Technical Specification

4.1 Charger regulatory requirements and reference standards

The design and manufacture of this product must meet the related requirements of vehicle which applicable regulations and standards in China, reference standards as following:

No.	Standard Code	Standard Name	Remark
1	QC/T 895-2011	Conductive on-board charger of electrical vehicle

5.3.4 DC/DC Converter Protection Functions

	Input	320V
	over-voltage protection	>454±5V
	Input low-voltage	320V
	protection	<206±5V
	Output over-voltage protection	Output voltage over-voltage protection threshold is 16±0.5V, working recovery after voltage back to ≤14±0.2V
Protection Functions	Output low-voltage protection	Output voltage low-voltage protection threshold is 7±1V, working recovery when voltage rise to≥9±0.2V
	Output over-current protection	Stop output when output current>90A
	Over-temperatur	Power start to decrease when internal temperature rise to 100°C , shut
	e protection	off when rise to 110 $^\circ \! \mathbb{C}$, auto-recovery when power decreased
	Short circuit protection	Yes, auto-recovery

6 Interface

The interfaces in the charger can be grouped into two categories, one category is low voltage interface, the other is high voltage interface.

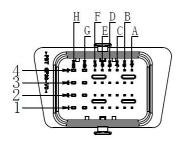

Low voltage interface includes signal connector and DC/DC output

High voltage interface includes AC220V input, OBC output and DC/DC input.

Connectors can be appointed by customer if quantity order is more than 5000pcs.

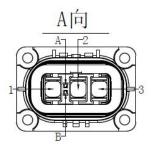

6.1 Low Voltage Connector and Pins Definition

Pin No.	Name	Definition	Description

7.2 Liquid-cooled Drawing

8. Label , Package, Transport and Storage

8.1 Label

8.2 Package

The packing box shall be provided with product name, model, manufacturer identification, inspection certificate of the manufacturer's quality department, manufacturing date, etc; There is a list of accessories in the packing box:

No.	Item	Qty	Unit	Remark
1	On-board Charger	1	pc	
2	Outboard bill	1	pc	

8.3 Transportation

The product shall be transported in a firm packing box, which shall comply with the provisions of relevant national standards and shall be marked with "handle with care" and "moisture-proof". The packaging box containing the product can be transported by various means of transportation. Direct rain and snow and mechanical impact shall be avoided during transportation.

The products shall be stored in the packing box when not in use. The ambient temperature of the warehouse shall be -10-40 °C and the relative humidity shall not be greater than 80%. There shall be no harmful gas, flammable, explosive products and corrosive chemicals in the warehouse, and there shall be no strong mechanical vibration, impact and strong magnetic field. The packing box shall be at least 20cm above the ground and at least 50cm away from the wall, heat source, window or air inlet, The storage period under the specified conditions is generally 2 years, and the inspection shall be carried out

again after more than 2 years.

The product shall be stored in a ventilated and dry place. At the same time, high temperature sources, fire sources and chemicals must be avoided. Store neatly to avoid throwing.

8.5 Safe Guide

Warning: remind the user that the operation is dangerous

- * It is strictly prohibited to disassemble and refit the on-board charger for repair or commissioning
- * Do not place the parts in the rain
- * Please confirm that the housing is intact before installation. If it is damaged, please replace it immediately or contact the after-sales service department
- * All plugs and sockets shall be connected firmly. If they are damaged or loose, please replace them immediately
- *It is strictly prohibited to plug and unplug the connector when the product is powered on, otherwise personal injury may be caused
- *It is strictly prohibited to open the product shell during the power on operation of the product, otherwise personal injury may be caused
- * It is strictly forbidden to touch the high-voltage live parts of the product with bare hands. Please wear insulating gloves, insulating shoes Insulating clothing, live maintenance and detection are strictly prohibited
- *During the replacement of fuses and contactors, barbaric operation is strictly prohibited to avoid damaging the product and causing potential safety hazards
- * Three core cable with grounding wire shall be selected for AC power supply, and the grounding wire
- * Please unplug the power plug if there is abnormal sound or smell during the operation of the charger
- * Please keep away from fire sources and inflammables and explosives when the battery is normally charged
- * Do not charge damaged or non rechargeable batteries

Note: remind the user that the following operations are important operations of the product

- * Do not block the air inlet and outlet of the charger to prevent overheating
- * Please make sure that the output cable is not too long to avoid the impact of line voltage drop on charging
- * Please disconnect the power cord and charging plug when moving the charger
- * The battery voltage must be consistent with the nominal voltage of the charger
- * Avoid collision, compression, pulling, twisting or shaking the charging cable
- * The product should be placed in a safe, ventilated, dust-free and rain free environment
- * Please pack and store if not used for a long time
