

8KW Battery Thermal Management System

Model No.: ATT8K-144S24-W

Specification

Item	Description	Technical Specification
1	Weight	≤46kg
2	Dimensions	845x543x290mm
3	Rated Cooling Capacity	1~8KW
4	Condensing Air Volume	3600m ³ /h
5	Water Pump	24VDC, 190W
6	Circulating Water Volume	30L/min(lift>10 meters)
7	Nozzle Diameter	Φ25 mm
8	Coolant Outlet Temperature	10~35°C
9	Compressor Rated Voltage	144VDC
10	Compressor Operating Voltage	85~265VDC
11	Refrigerant Type	R134a
12	Ingress Protection of Whole Unit	IP54
13	Ingress Protection of Low Voltage Components	IP66
14	Ingress Protection of High Voltage Components	IP67
15	Coolant	50% ethylene glycol
16	Communication Method	CAN2.0

Item	Description	Technical Specification
Environment		
1	Ambient Temperature	-30~50°C
2	Coolant	Antifreeze (50% ethylene glycol aqueous solution)
3	Power Supply Type	DC
Electrical parameters		
1	HV Rated Voltage	144VDC
2	High Voltage Range	85~265VDC
3	Low Voltage Rated Voltage	24VDC
4	Low Voltage Range	19~32VDC
5	Compressor Rated Power	3KW
6	Air Cooling Fan Rated Power	250W*2
7	Fan Maximum Air Volume	2000m ³ /h(single)

Structural Parameters
