# Manual Service Disconnector (MSD2)

## Features/Application

- Recodeal MSD2 provides stable high voltage power transmission for EV/HEV systems. The fuses in MSD2 provides overcurrent and short-circuit protection.
- Breaking structure and fuses are highly integrated inside which saves installation space and convenient for repair and maintenance.
- MSD2 is handle type connectors comprising of plug and jack. The jack is joint with cable.
- Front installation of socket for option.
- Operating current 250A and contact elements are comprised of a pair of power contact (φ11) and a pair of signal contact(φ1). Multiple brands for option.
- The connectors have rotatable locking handle and secondary lock-unlock structure, it's convenient to operate and save strength.
